What's inside:

[Secret 1: The 10X FX Profit™ Framework](#)

[Secret 2: The Forex Income Multiplier™ Framework](#)

[Secret 3: The Unlock Any Forex Robot™ Framework](#)

[Secret 4: The Fail 2 Gain™ Framework](#)

[Secret 5: The Many to One Portfolio™ Framework](#)

[Take Your Next Step to Success](#)

---

Are your results from forex trading underwhelming? Are you stuck making small profits or even losing money? Don't worry, you're not alone. Most traders are struggling to make serious profits, and many of them are actually losing money.

But what if there was a way to turn things around and take your trading to the next level? That would be truly amazing, right?

Well, what if I told you there were five different ways to boost your profits and inject a new lease of life into your trading!

Mind-blowing!

I call them the 5 secret ways to increase your forex profits.

# Secret 1: The 10X FX Profit™ Framework

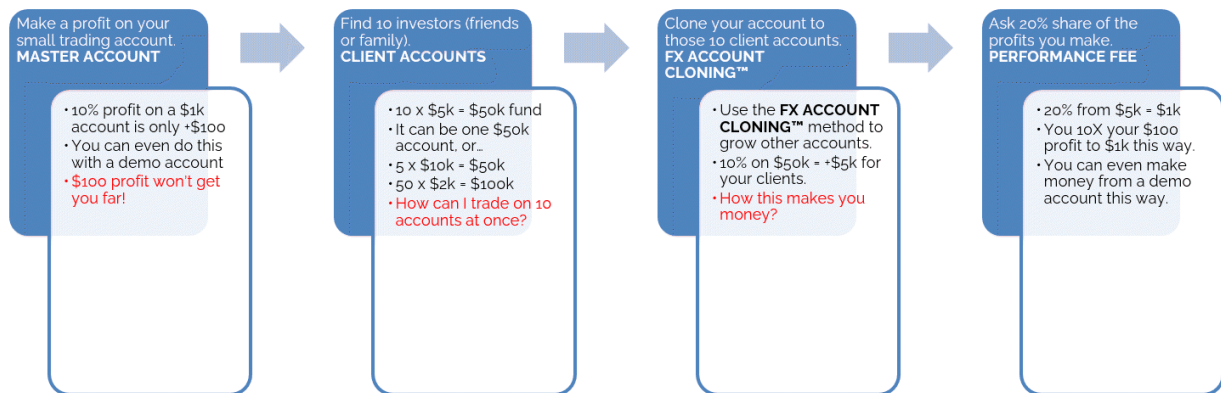

None of my secrets to forex trading success are all that hard to understand. You don't have to be a rocket scientist or anything like that. I'll take you through my [10 FX Profits™ framework](#), and you'll see that the beauty of it is how simple it is.

Say, for example, that you're a trader who's made a modest success out of a small forex portfolio or a demo account. As you already know, the problem you're going to run into is that making even a 10% profit consistently is great, but if your trading account is small, you're stuck making just a few bucks a month. And to get there, you had to devote a lot of your time and energy.

## The **10X FX PROFITS™** Framework

- Make 10 times more money on the exact same trades by simultaneously trading multiple accounts.
- Make money trading Forex on a Demo MT4/MT5 account.

### *The 10X FX Profits™ framework*

If you started trading with \$1,000 and you're reliably growing it by 10% every month, that's pretty awesome. You can double your account in a year. But it's still just \$100 a month. Not exactly the kind of income you can quit your day job for.

But if you started managing other accounts with your 10% profits, you could quickly be earning some real dough.

Let's say you managed 10 accounts, all worth \$5,000 – that's a nice \$50,000 fund to work with.

Suddenly your 10% profit is \$5,000 a month. Even if your share of that – the amount you get to keep – is just 20%, that's still \$1,000 a month! Ten times more than you had before.

All you have to do is clone your trading system across a few MetaTrader platforms using the [FX Account Cloning™ setup](#), and you can keep doing what you're doing now but make much more money!

In the image below, you see how I made a \$71k profit for a client several years ago when I used to manage accounts for other people.

*An example of me putting the 10X FX Profits™ framework to work!*

## Secret 2: The Forex Income Multiplier™ Framework

There's another clever way of boosting your income from trading if you have a working system but are stuck at the bottom of the ladder. The stats tell us that most traders are working with accounts that are \$1,000 or less.

You probably don't realize it now, but your potential is HUGE!! If you're managing to generate consistent profits, there are no limits to how high you can go.

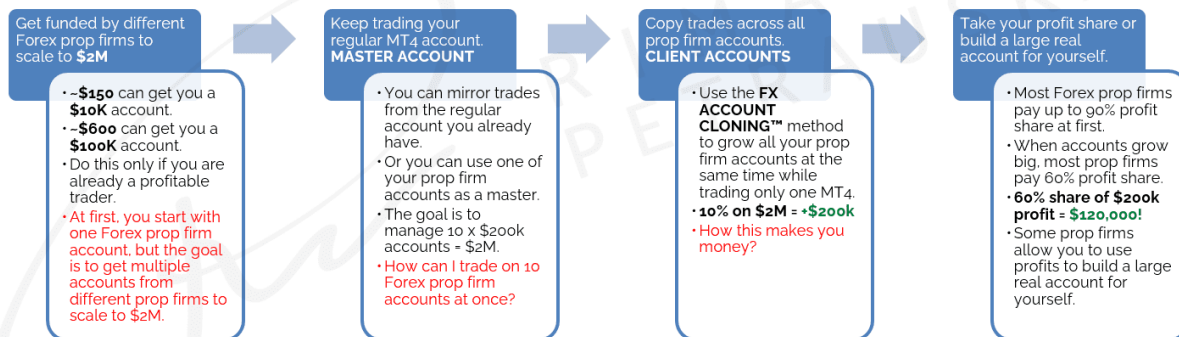

Traders who can regularly and reliably make profits of 10% are like gold dust to **Forex prop firms**.

A prop firm is a company that allows traders to use their money to make trades. In return, they let you keep a portion of the profit you make for them (usually at least 60%). A trader who can earn 10% returns time and time again is likely to sail through the evaluation process at a forex prop firm.

# The **FOREX INCOME MULTIPLIER™** Framework

- Generate 6-figure monthly income by managing multi-million dollar capital legally on multiple Forex prop firm trading accounts for up to 80% profit split.
- You do not need to get regulated or licensed.

## *The Forex Income Multiplier™ framework*

Once you're in, you can start showing that your trading system is reliable, and they will happily begin giving you bigger and bigger accounts to trade. Some prop firms say they fund accounts up to \$5 million!

But let's say you start with a funded account of \$200,000. If you can get financed at one prop firm, you can do it at others. The goal of the [Forex Income Multiplier™ framework](#) is to get funded by 10 Forex prop firms and work your way up the ladder to get \$200,000 at all of them. That would build up to a whopping \$2,000,000 fund that you manage, and now your 10% returns are bringing in \$200,000 a month. If you get to keep 60% of that, your

monthly income is now \$120,000 instead of \$100. Say bye-bye to that day job!

- [How to turn your 10% gains on a \\$1k account into 6-figure monthly income using Forex Income Multiplier™ method](#)

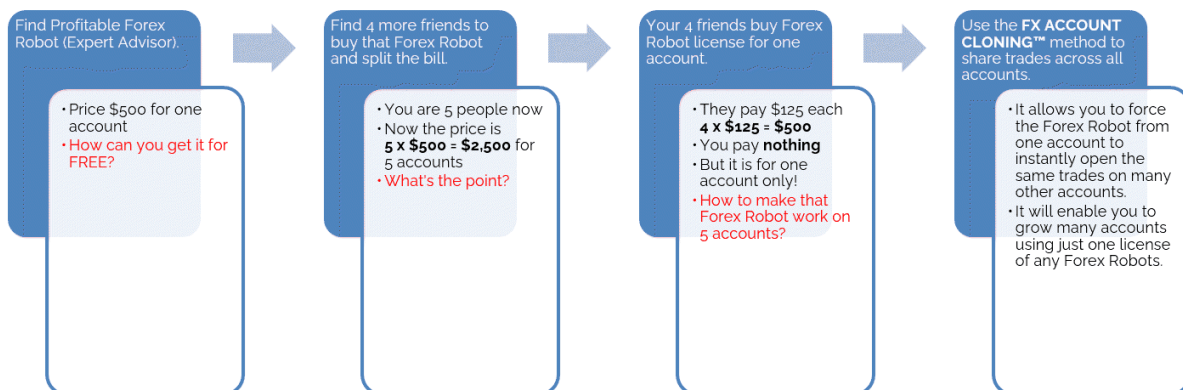

# Secret 3: The Unlock Any Forex Robot™ Framework

Many traders use forex robots to boost their trades and profits, but the problem is forex robot licenses can be costly. A forex robot locked to just one trading account can easily cost \$500 for just one account, but some are over \$1,000 as much as \$5,000.

But with the [Unlock Any Forex Robot™ framework](#), all you have to do is club together with a few friends, and you can bring that price right down. Even down to zero, well, at least for you 😊

## The UNLOCK ANY FOREX ROBOT™ Framework

- Get any Forex Robot for free and grow accounts for yourself and your friends
- Use MT4 Forex Robots On MT5 And Vice Versa

*The Unlock Any Forex Robot™ framework!*

Sounds impossible, doesn't it? But here's the thing, it's literally as simple as going out for dinner with a few friends.

Let me explain:

Imagine you're out with four other friends, and you want to split the bill. The obvious option is an even split, just like we do all the time when we hang out with our friends. Now, if you do that with a forex robot, that takes a \$500 license cost down to \$100 each. That's pretty good right there.

But what if you said to your four friends, *"I'll find a way for us to share a forex robot five ways. You just buy the license"*? Then they'd be paying \$125 each for the trading robot license, and you'd pay nothing at all! For them, that's a significant saving of \$500, and for you, it's the perfect way to get access to a forex robot with no up-front costs at all.

All you have to do is learn how to use the [Unlock Any Forex Robot™ framework](#) so that you can share trades from that Forex robot to all your friend's accounts, and you're good to go!

# Secret 4: The Fail 2 Gain™ Framework

Look, we all know the sad truth is that most traders are losing money. I even mentioned it at the beginning of this blog post. But believe it or not, there's even a way to turn that depressing fact to your advantage.

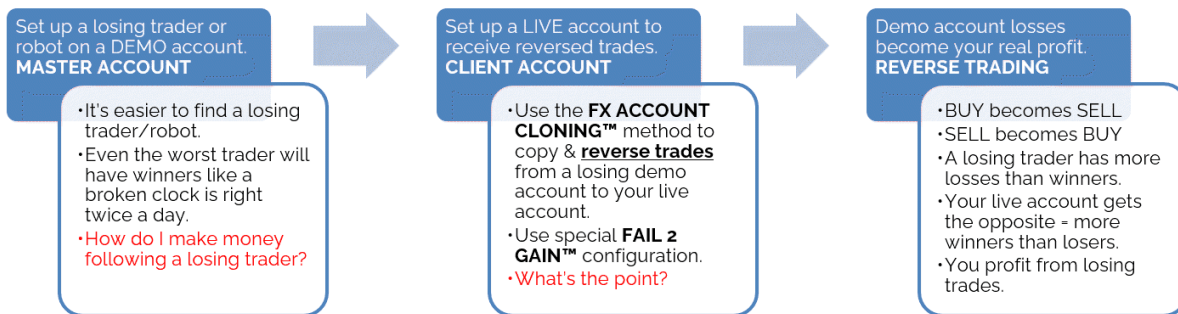

The more seasoned traders reading this will already know what I'm talking about – it's called reverse trading. It isn't easy to pull off, but there's a simple way to make it work. I call it the [Fail 2 Gain™ framework](#), and the idea behind it is pretty easy to grasp. If you can just make the opposite moves of a losing trader, you'll end up with winning trades.

Now, I don't want to make this personal, so let's just say you have a forex robot that regularly and consistently makes losing trades. Maybe it was working well when you bought it, but over time it just got worse and worse as the market moved on. That's a pretty typical experience.

## The FAIL 2 GAIN™ Framework

- Make money by Reverse Trading a losing Forex Robot or a failing trader

### *The Fail 2 Gain™ framework in a nutshell*

But as most traders already know, you can't just do the opposite of a losing trader without first taking care of things like position sizes, removing stops, and understanding double spreads.

Step 1 is to set up your losing robot on a demo account. That's now your master account. You'll need to set up a second account that draws trades from the master and reverses them – that's Step 2. Step 3 is to link the accounts together, and Step 4 is setting up the [Local Trade Copier™ software](#) using a unique configuration to reverse the trades and remove stops.

## Secret 5: The Many to One Portfolio™ Framework

If you talk to any experienced forex trader, they'll tell you that a massive component of their secret to success is diversification. Now, most investors know how that works. You buy a bit of gold, some stocks, some EFTs, some bonds... blah blah. That's boring! Everyone knows that already. What I'm talking about here is diversifying your trading strategies. Now that's a new one, right? So, how can you do that? The vast majority of traders are working on perfecting one strategy, but you could quickly get one step ahead by combining a set of trading strategies and making them work for you as a team. That way, if one or two systems aren't bringing in the profits you hoped for, the others can cover for them.

## The MANY TO ONE PORTFOLIO™ Framework

- Create a low-risk **Investment Portfolio** of multiple strategies from multiple sources.
- Combine strategies from any source like Social Trading Networks, Forex Robots, or Investor Password accounts.

### *The Many-To-One Portfolio™ framework*

For example, you might be following **MQL5 Signals**, some traders from **ZuluTrade**, a couple from **MyFXBook Autotrade**, and you could also have a forex robot or two thrown into the mix. If you pool all those together, you could end up with a set of ten accounts that make up your portfolio of trading strategies. Now, if you could feed these into one account, all with different amounts allocated to them, you could have one trading account set up with a broker you trust, making trades according to ten different strategies. And if any of these stopped working for you for whatever reason, you can just swap them out. That's something you can do quickly and without being a coding expert

– all you need to do is follow my [Many-To-One Portfolio™ framework](#).
